

For the 2015 Model Year, the Toyota Camry has two OE sensor possibilities.

- The LE trim level with a centered speedometer uses the Dill 1218 Sensor.

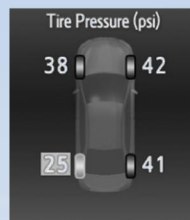

- The LE trim level with a centered color display screen uses the new Dill 1230 Sensor.

- All other trims use the new Dill 1230 Sensor.

This display screen allows the driver to view the individual tire pressures along with other menu screens.

Printed Circle = 1230

**Note:**

- 1230 Sensor will be available Q1 2015.
- Both sensors use replacement part kit 1100K.
- The sensors are not interchangeable.
